Skolaris

Automatic Timetable Optimisation

Offers fresh perspective on the problem
Optimises rather than just generates
Provides real-time optimisation feedback
Embraces user interaction

Not just another timetabling tool

- Accepts unprecedented conditions expected of the timetable
- Built for producing feasible and efficient timetables
- Produces a timetable with minimum user effort
- Hides deep configuration details from users that don't need them
- Versatile and deeply configurable
- Ready to meet specific conditions of most schools
- Aimed at satisfying student and staff requirements
- Supports manual scheduling with natural drag & drop
- Weighting system for contradicting requests
- Different conditions for different class groups and teachers
- Copes easily with late changes in data and requirements
 - ... even during the timetabling process
- Supports unlimited class group divisions and combinations
